

Luck of Birth - Amongst the complexity of this tragic situation in Europe, our goal is very simple - to get meaningful aid to the people who are now European Refugees.

We are a small family based in Totnes, our long term aim is to support the community of independent volunteers and groups who are really making a difference within this huge humanitarian refugee crisis in Europe. As long as this situation exists we will work to support these people and the amazing teams of volunteers who are working tirelessly around the clock providing food, shelter, clothing, warmth, medical attention and support.

Meaningful aid has become the mantra for us, we have become completely focused on how we can do this. From the ongoing research we have done we have realised that the requirements across Europe are changing so fast and on a daily or even hourly basis that it is the small independent charities or individuals who are really managing to achieve this meaningful aid work.

We are getting support to these incredible volunteers.

Currently we are doing this by donating two (possibly three...) seven seater 4x4's to volunteer groups on the Greek island of Lesbos, we are leaving on 28th February. The 4x4's will be donated to help them moving rescue boats, transporting emergency medical teams, volunteers and of course the refugees who are landing day and night, often in inaccessible places.

On the way down through Europe we will provide support to the independent groups and the refugee camps by bringing and distributing aid, but also purchasing what is required in the communities close to the refugees in order to support the local economies and bring what is really needed immediately to the people who need it.

The crisis is a shifting sand of need so we are remaining small and independent to be adaptable in the face of change. We are going to support them and to do this we need to be continually responsive.

We need financial support to remain responsive.

Please donate to us, any amount will make a difference and will go directly to the refugee crisis.

It is our firm belief that together we can help, offering our hands and hearts to help another human being is the only answer to this crisis.

Love, Thanks and Blessings

Theo, Sam and Paul

PS If you have any donations of firewood in bags please contact Sam via the facebook page. Thank you.
